Group 3: Sprint 7 Review Report

Aaro Jylhämäki, Juhana Hänninen, Leevi Rinnetmäki, Nea Lukumies.

What has been done?

- Finished code cleanup and ensured SonarQube evaluation shows all A.
- Documented required technical specifications and system architecture changes based on the test results.
- Ensured all functions work after refactoring.
- Performed performance testing to assess system responsiveness.
- Performed unit testing to ensure refactor didn't break UI.
- Addressed bugs and issues found during testing.
- Updated product documentation.
- Conducted heuristic evaluation.
- Localized database enums in the frontend.
- Conducted the planned acceptance test.

What is in progress:

- Everything in the sprint backlog has been completed.

Obstacles we faced:

- No obstacles
